President's Message

Year In Review

As the Branch's year draws to a close, I thought I would take a moment to reflect on this year's events and also a look at things to come. We have had many accomplishments this year and I would like to personally thank everyone involved with the Branch and its committees for their hard work and dedication. Without their service to the organization none of this would have been possible. In particular, countless hours were expended strategizing, developing, and creating the Branch's website. The website gives our members the free-

dom to access the Branch's activities, information and calendar of events at their convenience. With the website up and running, we are now working toward making improvements to increase its effectiveness and functionality for years to come.

Last year saw the development of the Branch's Stormwater and Mentorship Committees. Each committee has taken great strides during the current year to provide great benefit for our Branch members. The Stormwater Committee held regular informative dinner events on current topics related to stormwater management, treatment, water conservation, rules and regulations and best management practices. The Stormwater committee also provided a tour of the Seven Oaks Dam facility, which is one of the largest flood control facilities in the world.

The Mentorship Committee has made San Bernardino-Riverside Counties Branch the very first ASCE-Branch in the nation that has initiated and established a committee with on-going activities to promote and encourage mentorship between our experienced Civil Engineers and the YMF. They conducted a kickoff workshop, training course and quarterly events for our mentors and protégés to learn more about the program and interact with each other.

This year has seen the Branch further increase its awareness of legislative activity. Several Branch members attended Legislative Day in February to personally speak to our State Legislators and keep them aware of infrastructure needs in California.

Branch members have received informative updates on upcoming

(continued on page 2)

President's Message

(continued from page 1)

bills, propositions, the State budget and ASCE's position on legislative policy to encourage our members to voice their opinions. We also had a luncheon dedicated to increasing engineer's participation within the communities and local governments we live in.

The incoming Branch board has many accomplishments to achieve that we did not get to this year and I have full confidence that they will succeed and I wish them good luck in their endeavors. Finally, I would like to thank the members for making this a successful year and their participation

in all of this year's events.

Thank you for your continued support and commitment to ASCE.

Sincerely,

Terry Renner

Professional Issues

House Backs Highway and Bridge Aid Urged by ASCE

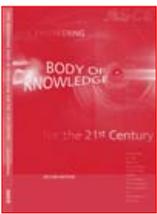

By overwhelming margins, the House of Representatives has endorsed two bills totaling about \$10 billion to aid work on highways and bridges, initiatives included in ASCE's Action Plan for the 110th Congress. With the plans now in the Senate, Key Contacts and all ASCE members should contact their senators to press for the bills' passage. House members approved H.R. 6532, a bill that would restore \$8 billion to the Highway Trust Fund to keep it solvent through 2009. The lower chamber also passed the National Highway Bridge Reconstruction and Inspection Act (H.R. 3999), a bill that would improve inspection requirements and authorize \$2 billion to repair deficient bridges.

Hagel Urges Enactment of National Infrastructure Bank

At an ASCE-sponsored infrastructure forum in Washington, U.S. Sen. Chuck Hagel (R-Neb.) reiterated his support for a National Infrastructure Bank, saying America risks falling behind in the global economy if it fails to invest in roads, rails and ports as aggressively as Asian and European nations. Hagel is co-sponsor with Sen. Christopher Dodd (D-Conn.) of a bill to establish the bank, which would sell tax credit bonds to finance major projects that would help remedy the poor condition of the nation's infrastructure. ASCE has made establishment of the bank one of the top priorities in its Action Plan for the 110th Congress. The forum was co-sponsored by Congressional Quarterly.

Civil Engineers Push for Historic Education and Licensure Changes

Next fall's class of civil engineering freshmen will witness historic changes in education and licensure during their careers. Guided by the *Civil Engineering Body of Knowledge for the 21st Century*, changes already underway in accreditation, curricula and licensure will better prepare them to be leaders and innovators. ASCE has released the second edition of the *Body of Knowledge*. In this new report, many of the original concepts and ideas have been clarified and sharpened, and their implementation will lead to the revision of current undergraduate and post-undergraduate education.

External Review Panel Issues Final Comments On IPET New Orleans Analysis

Three years after Hurricane Katrina roared ashore, and in the wake of Hurricane Gustav, ASCE's External Review Panel has issued its final set of comments on the Interagency Performance Evaluation Task Force's New Orleans analysis of Katrina's impact. While the ERP noted significant improvement over earlier drafts of the IPET report, and found little fault in the report's technical merits, the group did take issue with the unnecessary softening of a few of the report's assessments. The ERP also continued to call for greater clarity in IPET's risk assessment, due to its essential impact on long-term protection for the region.

Order of the Engineer

The Order of the Engineer was initiated in the United States in 1970 to foster a spirit of pride and responsibility in the engineering profession, to bridge the gap between training and experience and to present to the public a visible symbol identifying the engineer. Participants take the Obligation of the Engineer and wear a steel ring as a reminder of their commitment to high ethics and professionalism. **ASCE**

22ND ANNUAL JOINT GOLF TOURNAMENT

SAME- Inland Empire Post
ASCE-San Bernardino/Riverside Counties Branch

FRIDAY, OCTOBER 24, 2008

GENERAL OLDS GOLF COURSE
Adjacent to March Air Reserve Base
SELECT - SHOT FORMAT
STARTS AT 12:00 P.M. SHARP

\$60.00 PER PERSON INCLUDES:
Green Fees, Cart, Mulligans, Prizes, and Taco Dinner

Tournament size is limited, so register quickly.

PRIZES:

Team Prizes
Straightest Drive on #10
Closest to the pin and on the green on #8 and #16
Hit the green on either hole #2 or #11 for a bottle of wine

PLEASE NOTE:

In case of inclement weather, the tournament will be canceled and the full fee will be considered a donation to the scholarship funds. The tournament will be followed by a taco dinner, awards, and a very short business meeting. **The purpose of the tournament is to have a good time and raise money for the respective scholarship funds.**

ASCE Riverside-San Bernardino Counties MENTORING PROGRAM: BOWLING NIGHT

The San Bernardino-Riverside Counties Branch - Mentorship Committee arranged a Bowling Night social event. On July 24, 2008 a collection of both Mentors and Protégés met up for a few rounds of bowling at the AMF Arrowhead Lanes in San Bernardino. Many participants had a fun and exciting time bowling, sharing bowling tips and interacting with their mentors and fellow peers. The sounds of laughter, bowling balls, pins falling and cheers of a strike or a spare were heard throughout the night. In between breaks, participants chowed-down on a collection of pizzas, finger foods and beverages. The best bowling scores were made by Ronald Peters (205), Edwin Wen (166), Alfred Pedroza (128) and Jerry Burke (120). We would like to thank all of sponsors for their in-kind donations and/or support that helped make this event a success. This event was made possible through their sponsorship at no cost to our members. Currently, we are looking for experienced members in all fields of Civil Engineering to mentor Protégés. To join us on our future events and/or participate with our mentoring program, please contact Neil Nilchian, at nnilchia@rctlma.org.

AMF Arrowhead Lanes

Engineering Excellence Since 1942

This Month in History

Point of Beginning Public Land Surveys

East Liverpool, Ohio
Completed September, 1785

The "Land Ordinance of 1785" required that U.S. lands in the public domain be surveyed before sale, and that the surveys be made in accordance with a consistent, integrated system of lines grid-oriented to a true meridian (north-south reference line) and base line (east-west reference line), subdividing the land

into approximately square parcels, called townships.

Thomas Hutchins, the first Geographer of the United States, drove his stake near East Liverpool, Ohio to mark the Point of Beginning of the Geographer's Line, the first westward base line.

The surveys were required by the ordinance to begin "... on the Ohio River at a point that shall be found to be due north from the western termination of a line which has been run as the southern boundary of the state of Pennsylvania." This point was chosen because the southern boundary of Pennsylvania had just been surveyed, but the western boundary had not.

Text on the monument reads "1112 feet south of this spot was the "Point of Beginning" for surveying the public lands of the United States. There on September 30, 1785, Thomas Hutchins, first geographer of the United States began the Geographers' Line of the Seven Ranges. This inscription was dedicated September 30, 1960, in joint action of the East Liverpool Historical Society, and the American Congress on Surveying and Mapping. Ohio."-- Inscription on the "west face" of the marker.

The present monument was set at the rivers' edge in 1881 when the Ohio-Pennsylvania Boundary was re-surveyed and re-marked. In the 1960s the monument was endangered by an industrial land fill along the river, it was moved in 1960, 1112 feet north near the River Road between East Liverpool, Ohio and Midland, Pennsylvania. **ASCE**
