

President's Message

Chet Robinson, PE, GE

Hello ASCE Members,

The board for the ASCE San Bernardino / Riverside Counties Branch hopes that you are in good health as our counties, state, and country works to return back toward normal life. We acknowledge that we may never return to how things were, but we look forward to be able to meet with the amazing engineering community in our area again when we are able. Thanks again to the many branch members who continue to keep our infrastructure working.

The board is working to keep us connected with virtual meetings and social events until the Los Angeles Section directs us to resume face-to-face meetings. Our current focus is getting application in for our annual awards and scholarships. Please look into the newsletter and watch your email for links on how to nominate projects and individuals. Please consider some of the innovative projects you have participated in this year and some of the outstanding engineers that you have worked with. There are so many out there that deserve recognition.

We are still waiting to see when we can hold the awards and scholarship dinner. We have scheduled our annual scholarship golf tournament for October 2, 2020 with the anticipation that we will be able to host the event at that time. Please consider participating. Profits from the golf tournament go directly to scholarships and help to launch the next generation of civil engineers.

Please continue to reach out to any of the board members if you have questions about how ASCE is functioning and how you can be involved. We would love to hear from you.

Sincerely,

Chet Robinson, PE, GE

San Bernardino and Riverside Counties Branch President

Lunch “On Us” and Learning about Permeable Interlocking Concrete Pavements...The Ideal Combo Meal.

Angelus Permeable Holland installed in a herringbone pattern

ANGELUS PERMEABLE INTERLOCKING PAVING STONES (PICP) meets the US Environmental Protection Agency’s criteria as a structural Best Management Practice (BMP) while helping comply with US National Pollutant Discharge Elimination System (NPDES) regulations. They are a part of Low Impact Design (LID) and are LEED credit eligible under Sustainable Sites.

REDUCE CONTAMINANTS AND DECREASE RAINWATER RUNOFF rates while providing an attractive pedestrian, parking or roadway surface that is resilient, low-maintenance and ADA compliant.

100% PERMEABLE SURFACE allows rainwater to pass through small, aggregate-filled openings between solid, high strength durable concrete paving stones and into an open-graded base where it is stored until infiltrating back into sub-soils and replenishing groundwater.

MAXIMIZE USABLE/BUILDABLE SPACE ON SITE and save on costs by reducing or eliminating the need for drainage appurtenances, storm sewers and detention or retention ponds.

EARN 1 PROFESSIONAL DEVELOPMENT HOUR (PDH) by attending a Lunch ‘n Learn presented by an Interlocking Concrete Pavement Institute (ICPI) qualified instructor.

Schedule Your Angelus Lunch ‘n Learn today at angeluspavers.com/lunch
